PORTFOLIO · 2026 · INDORE, INDIA

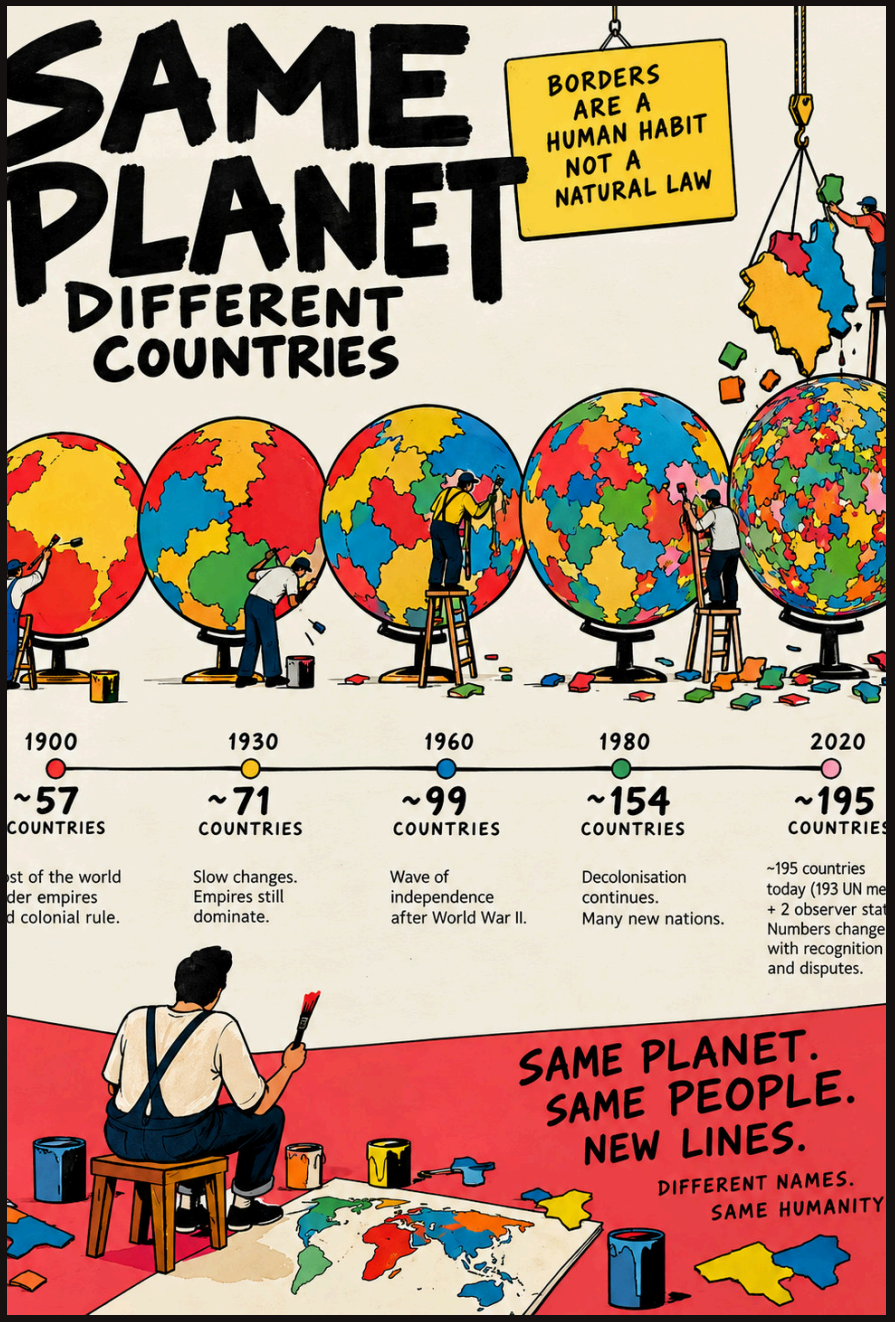

Vipul Papriwal

Visual + narrative architect.

I make pictures and stories, and I help communities hold them — including in Web3. I direct a small studio of AI agents: I set the idea, the rules and the look; they draft; nothing goes out without my yes.

Same Planet Different Countries

01 X ACCOUNTS · @EBHAGAVADGEETA

@eBhagavadGeeta

A daily, source-checked reading of the Bhagavad Geeta as a practical life manual.

What is GITA.EXE? GITA.EXE

The city inside the head

@psychsync_

Quiet tools for mind and mood — breath, noticing, and habit. Not medical advice.

Your eyes are a filter

The Overthinking Weather System

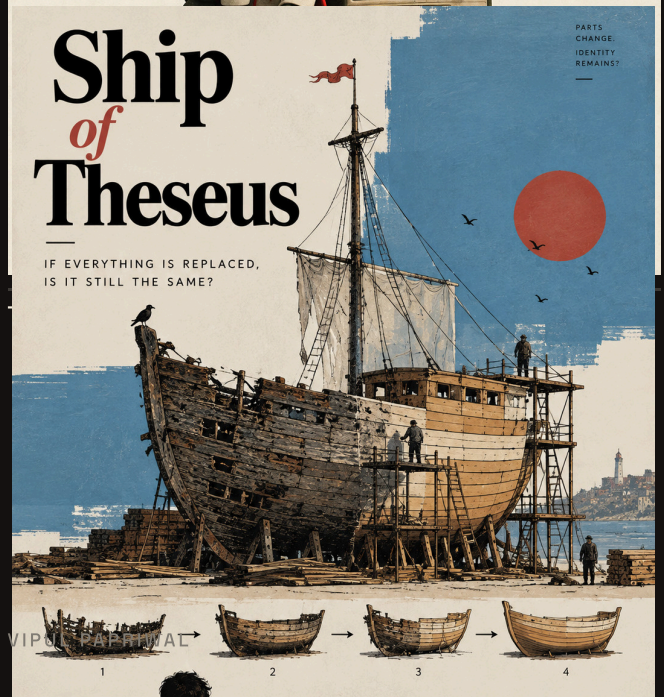

@VipulPapriwal

The main studio: pictures, stories, and a red-hooded figure who keeps turning up.

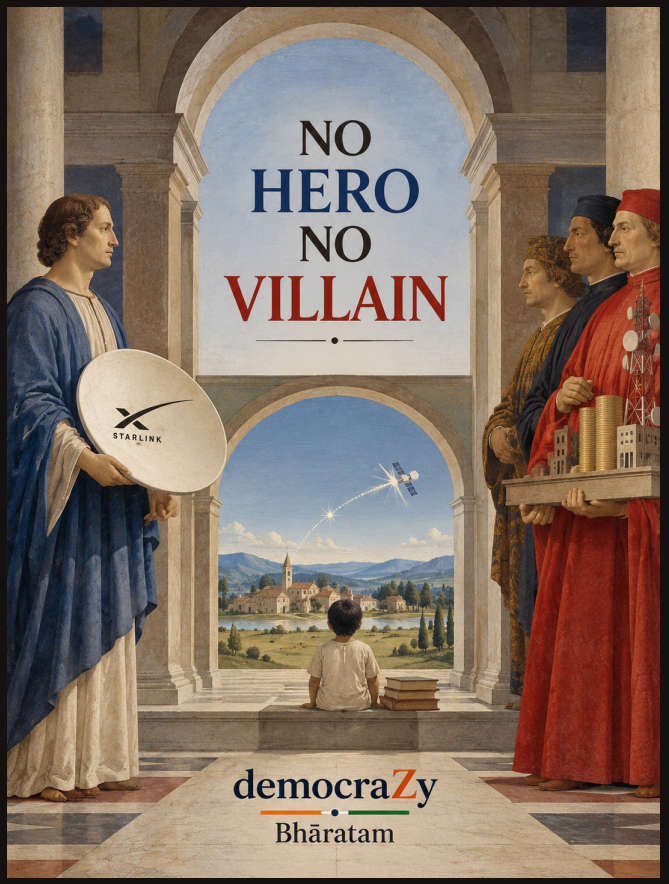

Everything changes, but we keep scrolling

@bharatamverse

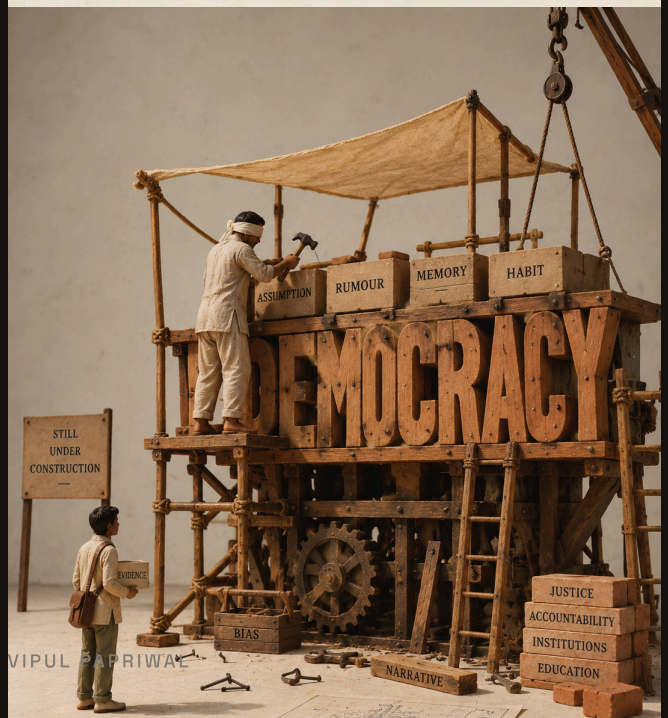

Indian stories and symbols, drawn back into everyday attention.

No Hero No Villain DEMOCRAZY.EXE

@veeepulll

The messy twin. Experiments and pictures that don't need a tidy box.

Skill Issue, Bhai

Are you sure of yourself?

G*BOY / Neuko

Fan art made in the Neuko / G*BOY world. Not official Neuko work.

I'm an active community member in the G*BOY / Neuko world. I don't just follow the lore. I make things inside it. The three pictures here are fan art I made in that world — an off-the-clock crew, a red-hooded kid on a leaking server, and the same kid rebuilt in clay.

No More Hybrid Meetings. The whole crew, off the clock, after one call too many.

Server kid. A red-hooded kid holds court on top of an old server, and the data spills over.

Clay Mark. The same hooded kid, rebuilt in plasticine, sitting on the Neuko mark.

03 COMMUNITY · SOLANA

Solana

Fan art for the Solana community. Not official Solana work.

I'm finding my place in the Solana community, with Superteam India as a direction I want to grow in. I don't have a shipped Solana product to show yet. The community craft is already there in my Neuko work, which began as a Solana project.

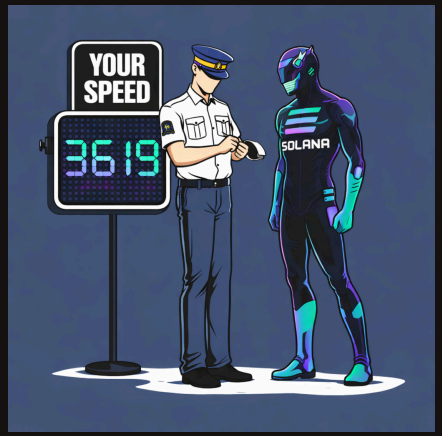

Pit light. A Solana-liveried car, side-on, in a wash of colour.

Pit lane. A top-down view of a crew around the car.

Sunset ride. A small rider heads toward a low coloured sun.

Your speed. A roadside check.

Riverside pavilion. A spiral glass house over the water.

Indore, India

04 ABOUT · EXPERIENCE

Hi, I'm Vipul.

I'm an artist who builds with AI agents. Before this self-directed stretch I worked in customer support at Teleperformance, which taught me to stay calm, listen first and explain clearly.

ahimsa · nobody hurts nobody.

Now — Independent artist and builder. A small AI-agent studio, the eBhagavadGeeta series, and G*BOY / Neuko community work.

2018–19 — Customer Support Associate, Teleperformance, Indore.

Learning — Projection mapping, self-taught with one projector, one cable, and MapMap.

Work with me.

A role, a freelance project, or an art piece. Write to me, or start from my Linktree.
